

TOPS Colon Cancer **Awareness Event** *thru the month of March*

TOPS Markets has partnered with the **Cancer Services Program of New York State** to provide our customers the opportunity to speak with a CSP representative about the risks of colon cancer and qualifications for an Early Detection Screening Kit. The “**FIT Kit**,” is a simple take-home test to aid in the detection of colon cancer. **Eligible customers** 50 years or older can visit participating TOPS Pharmacies during **select dates** in March to pick up a test kit. The kit may be free to individuals without insurance and covered in full by most major insurance plans.
